

# Star Wars Movie Tracker

---

## Overview

---

This website allows you to select which Star Wars movies are your favorite by using the hearts to select, store, update, and remove your choices. It pulls its data from [The Star Wars API](#).

## Features:

- The data is presented in a checklist format.
- Press the heart on the left side of the movie title to select it as a favorite
- Choices are locally stored so they are saved even after a refresh

## Running The Project

---

Live Version:

[Stars Wars Movie Tracker](#)

Locally:

- Download attached folder to your computer
- Open the index.html file in the browser of your choice

From the repo:
